### 4. FIRST AID MEASURES

#### First Aid Procedures:

<b>Inhalation:</b>	Remove to fresh air. If breathing is difficult, administer oxygen. If the victim is not breathing, provide artificial respiration. Get medical attention.
<b>Ingestion:</b>	Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, keep head low so that vomit does not enter lungs. Never give anything by mouth to an unconscious person. Get medical attention.
<b>Skin Contact:</b>	Wash affected area with plenty of water for at least 15 minutes. Remove contaminated clothing and shoes. Wash clothing before reuse. Get medical attention if symptoms occur.
<b>Eye Contact:</b>	Check for and remove contact lenses. Immediately flush eyes with gentle but large stream of water for at least 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention.

**General Advice:** In the case of accident or if you feel unwell, seek medical advice immediately (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance.

**Notes to Physician:** Treat symptomatically.

### 5. FIRE FIGHTING MEASURES

**NFPA Ratings:** Health: 2 Flammability: 1 Reactivity: 0

**Flammable Properties:** May be combustible at high temperatures.

**Flash Point:** No information found

**Auto-ignition Temp:** No information found

**Flammable Limits in Air (% by volume):** Lower Explosion Limit: No information found  
Upper Explosion Limit: No information found

**Suitable Extinguishing Media:** Water spray, dry powder, alcohol resistant foam, carbon dioxide

**Unsuitable Extinguishing Media:** Do not use a solid (straight) water stream as it may scatter and spread fire.

**Hazardous Combustion Products:** Carbon oxides, nitrogen oxides

**Specific Hazards:** May be flammable or explosive in the presence of heat, flames, and sparks. High powder concentrations in air may cause an explosion hazard.

**Special Protective Equipment** As in any fire, wear MSHA/NIOSH approved (or equivalent) self-contained positive pressure

<b>For Firefighters:</b>	or pressure-demand breathing apparatus and full protective gear.
<b>Specific Methods:</b>	Use water spray to cool unopened containers. Move containers from fire area if you can do so without risk. In the event of fire and/or explosion, do not breathe fumes.

## 6. ACCIDENTAL RELEASE MEASURES

<b>Personal Precautions:</b>	Ventilate area of leak or spill. Isolate hazard area and keep unnecessary and unprotected personnel away from the area of the leak or spill. Wear appropriate personal protective equipment as specified in the Exposure Control and Personal Protection Section 8. Avoid generation of dust in the surrounding air. Avoid contact with eyes, skin, and clothing.
<b>Environmental Precautions:</b>	Prevent further leakage or spillage if safe to do so. Do not contaminate water. Avoid discharge into drains, water courses, or onto the ground.
<b>Methods for Containment:</b>	Prevent entry into waterways, sewer, basements or confined areas. Dike the spilled material, where this is possible.
<b>Methods for Cleaning Up:</b>	Absorb spill with an inert material (e.g. vermiculite, dry sand, earth, cloth, fleece), and place in a non-combustible container for reclamation or disposal. Clean contaminated surface thoroughly. Never return spills in original containers for re-use. Clean up in accordance with all applicable regulations.

## 7. HANDLING AND STORAGE

<b>Handling:</b>	Do not handle or open near flame, sources of heat, or sources of ignition. Wear personal protective equipment (see section 8). Provide sufficient air exchange and/or exhaust in work rooms. Avoid contact with skin, eyes and clothing. Do not ingest. When using, do not smoke. Keep away from incompatible materials. Handle in accordance with good industrial hygiene and safety practice. Wash thoroughly after handling. Containers of this material may be hazardous when empty since they retain product residues. Observe all warnings and precautions listed for the product.
<b>Storage:</b>	Store in a cool, dry, ventilated area away from flame, sources of ignition, heat, and incompatible materials. Store in a segregated and approved area if possible. Store in original container. Keep out of light. Keep containers tightly closed and upright. Keep away from food, drink and animal feedingstuffs. Keep out of the reach of children. Comply with all national, state, and local codes pertaining to the storage, handling, dispensing, and disposal of this product.

## 8. EXPOSURE CONTROL AND PERSONAL PROTECTION

<b>Exposure Limits:</b>	No information found
<b>Engineering Controls:</b>	Ensure adequate ventilation. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.
<b>Personal Protective Equipment:</b>	
<b>Eye/Face Protection:</b>	Wear goggles or safety glasses with side shields and a face shield.
<b>Skin Protection:</b>	Wear appropriate chemical resistant clothing (with long sleeves) and appropriate chemical resistant gloves.

**Respiratory Protection:** Use a positive-pressure air-supplied respirator if there is any potential for an uncontrolled release, if exposure levels are not known, or in any other circumstances where air-purifying respirators may not provide adequate protection.

**General Hygiene Considerations:** Avoid contact with skin, eyes and clothing. When using, do not eat, drink or smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Provide eyewash station and safety shower.
